📄 architsureja.github.io

Software Engineer with 10+ years of experience, specializing in Backend, FrontEnd, Mobile, Cloud Security, and Infrastructure using AWS, Java, Node.js, React, Android, and Next.js. Expertise in modernizing critical authentication frameworks, delivering Passkey integration, Regionalization support, and IPv6 integration. Committed to delivering high-level solutions that increase business value and result in exceptional cost efficiencies.

SKILLS

Kotlin / Java	★★★★☆
Java Spring / Backend	★★★★☆
AWS	★★★★☆
React / NextJS	★★★★☆
Node.js / TypeScript	★★★★☆
IntegTest / Canary	★★★★☆
Android	★★★★☆
Unit Test Case	★★★★☆
Research & Development	★★★★☆
Backbase Mobile	★★★★☆
Problem Solving	★★★★☆
Scrum / Agile	★★★★☆
Jenkins / Sonar / Git	★★★★☆
React-native / Redux	★★★★☆
Database	★★★★☆
Xcode / IOS / Swift	★★★☆☆
Python	★★★☆☆

Terminology

MVVM, MVP, cypress.io, vitest, K6, Kotlin Coroutine, Jetpack Navigation, Jetpack Compose, Live data, Rxjava, Koin, Dagger2, Room Database, Mockito, Mockk, data bidding, view bidding, Glide, retrofit, REST, TDD

WORK EXPERIENCE

SOFTWARE ENGINEER | Amazon (AWS) | Toronto | Oct 2021 - Cont.

- **Full Stack Development:** Manage the complete software development life cycle, encompassing technical design, coding, testing, deployment, and maintenance. Deliver software components and feature enhancements while maintaining Git repositories, CI/CD pipelines, integration tests, and service Canaries.
- **Architecture & Infrastructure:** Architect and implement secure cloud infrastructure using Java, Spring Boot, and AWS CDK, focusing on regionalization, compliance (GovCloud), and multi-region CDN deployment. Utilize Node.js, React, Next.js, and Kotlin to optimize frontend experiences across Desktop, Mobile, and Tablet.
- **Security & Operations:** Lead high-severity incident resolution and drive security hardening initiatives, such as HTTP slowloris protection, hardware token issue diagnostics, protect non-public path, and MFA API enhancement,.
- **Testing & Quality:** Design and maintain comprehensive testing frameworks using Cypress.io, Vitest, K6, and Mockito, Mockk. Manage 100+ Canaries and integration tests covering Root, IAM, and MFA workflows to ensure authentication resiliency, including the first-ever E2E Canary implementation for Passkey setup and authentication.
- **Mentorship:** Mentor interns and engineers on backend integration, security best practices, and operational excellence. Actively contribute to recruitment and interviewing processes for the team.
- **Collaboration:** Collaborate with product stakeholders as well other internal teams to assess proposed user experience (UX), provide feedback, suggest improvements, and represent engineering considerations.
- **Leadership:** Lead strategic, cross-functional team projects involving multiple stakeholders to drive delivery milestones.
- **Operational Excellence:** Provide ongoing operational support to the team and identify opportunities to enhance system reliability and efficiency.

CONTEXT ON PROJECTS

- **IPv6 Infrastructure & Security:** Architected and implemented full IPv6 support for the AWS Sign-In domain, including threat modeling, API Gateway integration for GovCloud, and multi-region CDN setup using AWS CDK for passkey support on new domain.

AWARDS

EDUCATION

MASTER OF TECHNOLOGY

Nirma University, Ahmedabad, 2013

- Major in Information and Communication Technology

BACHELOR OF ENGINEERING

Gujarat University, Ahmedabad, 2011

- Major in Information Technology

DIPLOMA

Technical Examination Board, Gandhinagar, 2008

- Major in Information Technology with 1st ranked in class

HOBBIES

Gaming, Cooking, Biking

- **Passkey for MFA:** Led the end-to-end implementation of Passkey as a MFA method, resolving dual RPID challenges and enabling Windows 10 cross-platform support.
- **Root Enablement (EUSC partition):** Implemented Root account functionality (Login, Password Reset, Account update) within the **EUSC partition**.
- **Signup Architecture Redesign:** Authored comprehensive High-Level and Low-Level Designs (HLD/LLD) for migrating the Signup service behind Console architecture.
- **Authentication resiliency:** Enabling Root authentication at other regions to make it resilient to region failure.(Currently in passive mode)
- **New UI/UX Implementation:** Migrated AWS Sign-In Service to modern stack using **CloudScape, React, and NextJS**.
- **Mobile SDK Development:** Developed Android and iOS SDKs for AWS Sign-In service to provide secure authentication using in-app browsers.

SOFTWARE ENGINEER | Infotree technology | Pointe-Claire | Sep 2021 - Oct 2021

- SDK development for map utils and features with use of **Google map** and **MapBox** libraries.
- Writing of Unit test cases, Instrumental test cases and automation UI test cases for robustness, security, usability.
- Consistently delivered and **implemented quality units** with functional features and **minimal defects**.
- Met product specifications and achieved goals for maintaining quality.

SENIOR ENGINEER | Mobiquity Inc. | Ahmedabad | Oct 2017 - Jun 2021

- Designed technical architecture proposals to enhance and integrate **Backbase Framework systems** and other third parties libraries.
 - **Met** all project **deliverable milestones** as defined by stakeholders by ensuring immediate resolutions of issues as they arose.
 - **Supervised 3-6 team members** to resolve obstacles to projects by following the company's best practices strategies.
 - Programmed mobile applications using **Android, React-native, and Kotlin** object-oriented languages to enable code abstraction, stability and reuse of programs.
 - Configured **Sonar** and **Jenkins** pipeline to support and enhance code quality and fast build delivery .
 - Improved software quality and reliability by **implementing integration tests** (with **75%+ code coverage**) for robustness, security, usability.
 - Consistently delivered and **implemented quality units** with functional features and **minimal defects**.
 - Met product specifications and achieved goals for maintaining quality. Learning **Cloud Services** and **ML** and updated standards of the Development world.
-

SENIOR ANDROID DEVELOPER | *e-Procurement Technologies* | *Ahmedabad*
| *Jan 2017 - Oct 2017*

- **Met** all project **deliverable milestones** as **defined by stakeholders** by ensuring immediate resolutions of issues as they arose.
- Programmed mobile applications using **Android, Kotlin, SQLite, Beacon, NFS**.
- Designed and **implemented library modules** to integrate with any system.
- Designed and **implemented proof-of-concept** application.
- Consistently delivered and implemented quality units with functional features and minimal defects.
- Collaborated with QA testers to conduct end-to-end unit testing and post-production testing.

SENIOR ANDROID DEVELOPER | *Techreco Solution* | *Ahmedabad*
| *Mar 2016 - Jan 2017*

- Programmed mobile applications using **Android, JAVA**.
- Designed and implemented proof-of-concept application and library module.
- Consistently delivered and implemented quality units with functional features and minimal defects.
- Collaborated with QA testers to conduct end-to-end unit testing and post-production testing.

ANDROID DEVELOPER | *Percept InfoTech* | *Ahmedabad* | *Mar 2014 - Mar 2016*

- Programmed mobile applications using **Android, JAVA, Unity3D**.
- Consistently delivered and implemented quality units with functional features and minimal defects.

PROJECT ENGINEER | *Institute for Plasma Research* | *Gandhinagar*
| *Jun 2012 - Mar 2014*

- Programmed controlling system for prototype robot using **ROS (Robotic Operation System), Arduino, Raspberry Pi, Xbee Technology**.
